

Application

In the gas technology, very high demands are placed on the tightness of the piping, especially with critical gases. Such systems are often piped with high-quality clamping ring fittings.

To avoid additional connections, we offer pressure gauges with pipe sockets for the common screw fitting manufacturers.

For further details on the pressure gauge models RCh 63 – 3 and RSCh 63 – 3, please refer to the corresponding data sheets 1211 and 1610 respectively.

Technical Data

Accuracy (DIN EN 837-1)

Class 1.6

Nominal Case Size

63 mm (2½")

Wetted Parts

Stainless steel 316L

Pressure Ranges (DIN EN 837-1)

0 – 0.6 bar to 0 – 600 bar

Process Connection

6 mm or ¼" external tube diameter

Case

With bayonet ring, stainless steel 304 (1.4301)

Safety Category According to DIN EN 837-1

See data sheet

Options

- Upon request, we also deliver instruments including clamping ring and union nut
- Other external tube diameters upon request
